

Evje Project – Past Production 2.6Mt @ 0.75%Ni

- ❖ Property covers the historic Flåt and Kjettevann Mines and many of the numerous nickel showings in the area

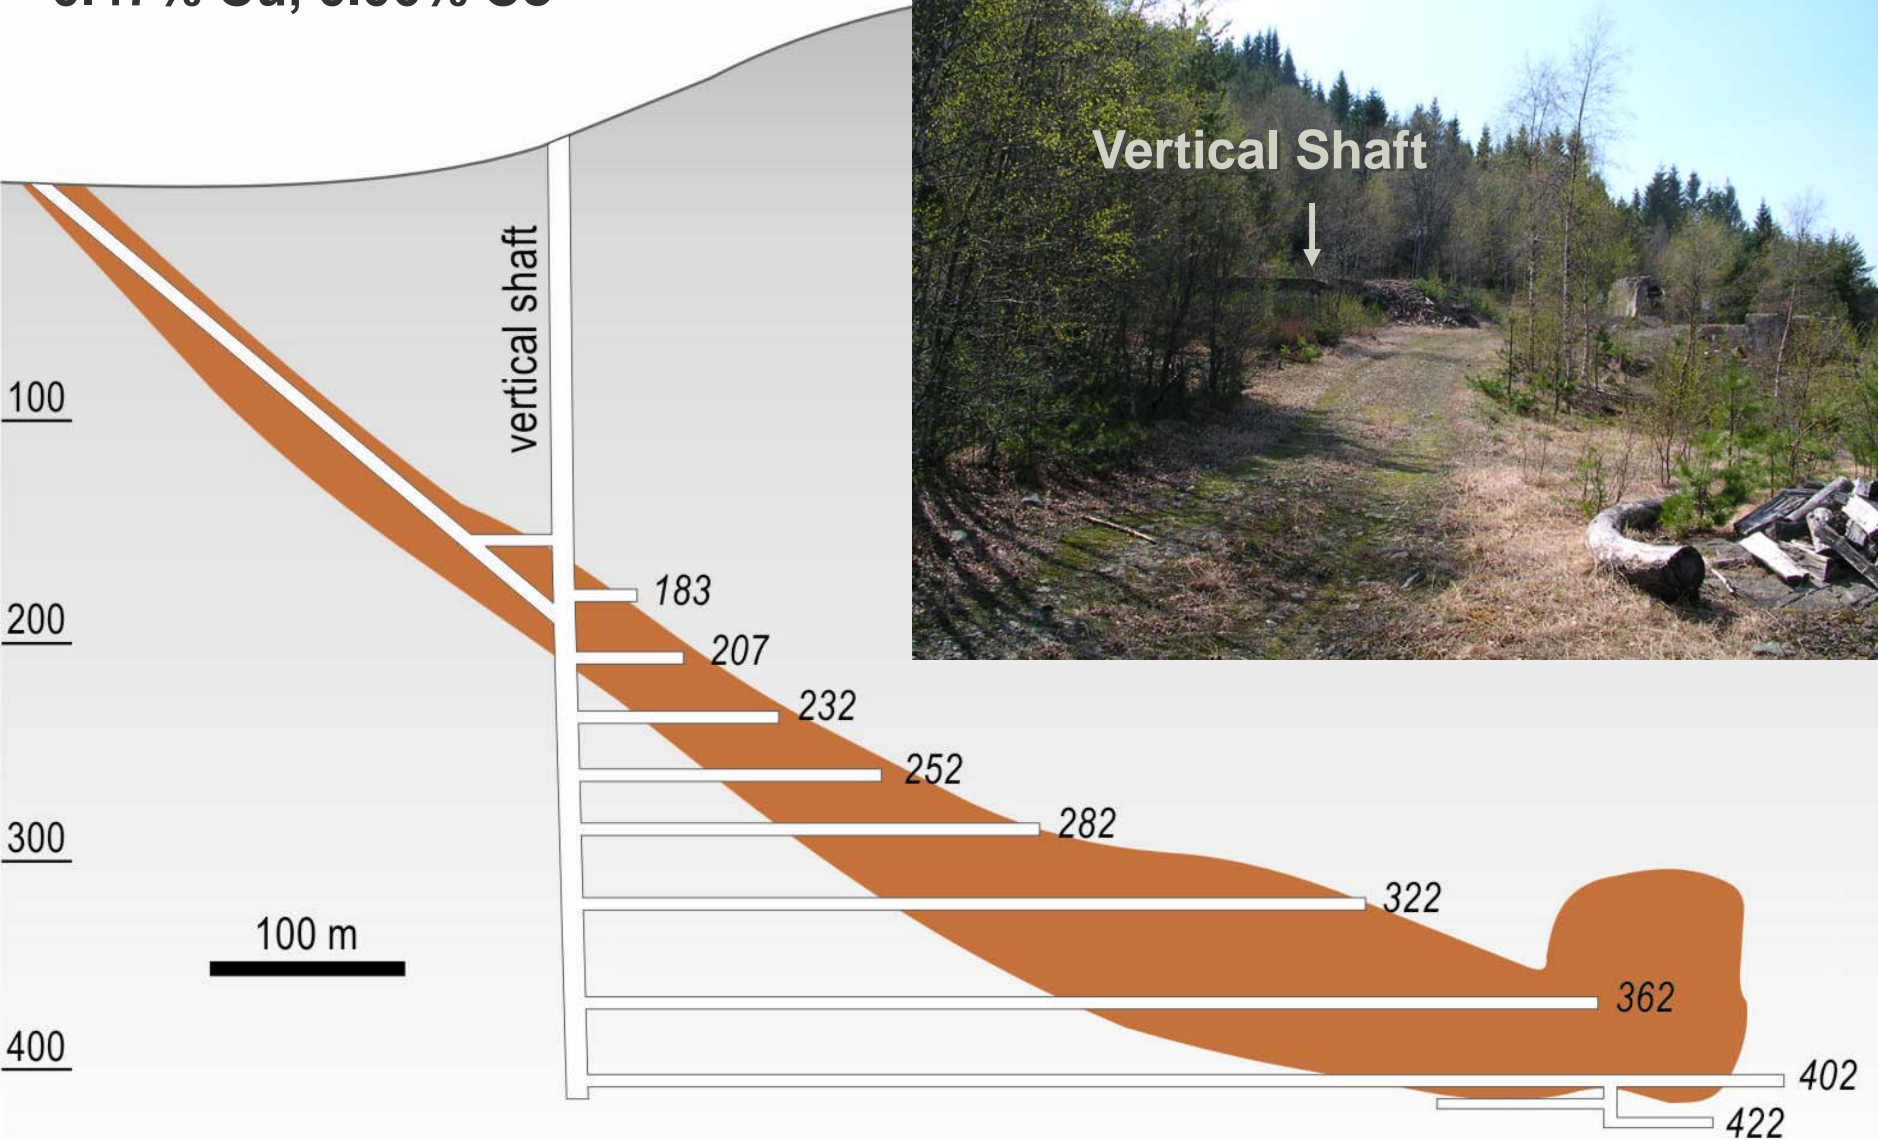

Evje Project Regional Geology

Included in the project area is the Flåt Nickel Mine, an historical producer and once the largest nickel mine in Europe, employing 350 men in the underground mine and refinery in the early 1900's.

Flåt Mine Historical Production **2.6**
million tonnes grading **0.75% Ni**,
0.47% Cu, **0.06% Co**

The Historic Nickel Mines

Kjettevann (2.71% Ni)

Grab sample of stringer Cu mineralization
from the Kjettevann Mine

0.15% Ni, 3.53% Cu, 0.01% Co

**Historical production:
285 tonnes at
2% Ni**

Evje Project Summary

- ❖ Extensive Voisey's Bay age rocks
- ❖ A large number of old nickel showings
- ❖ Good nickel grades found in waste pile sampling
- ❖ Only one drill hole testing for the extension of the Flåt Mine

Grab sample of semi-massive sulphide from the Flåt Mine

**1.61% Ni, 0.28% Cu, 0.12% Co,
0.1g/t Pt, 0.05g/t Pd**

Grab sample of stringer Cu mineralization from the Kjettevann Mine

0.15% Ni, 3.53% Cu, 0.01% Co
